

Bridge the Gap

Large enterprises have skilled teams that can take on general IT assignments. However, when implementing the latest SAP, Oracle, PeopleSoft and BI updates and technologies, companies often need to strengthen their teams with highly specialized knowledge and expertise. For example, companies may need a functional expert with specific know-how or an experienced project lead with a proven track record. In many cases, bridging these critical functional and technical gaps is the key to achieving project goals with less risk.

Multiple Options

Companies have three options when seeking ERP/BI consulting expertise. They can engage general IT staffing agencies, major consulting firms, or leading independent consultants. IT staffing agencies are very good at sourcing general IT skillsets and major consulting firms are a good option for companies that want to outsource an entire IT project. However, companies that need highly skilled experts often turn to independent consultants that integrate well with existing project teams.

Introducing EdgeRock

Introducing EdgeRock – the leading provider of highly skilled ERP and BI consultants. Our seasoned client service managers and technical recruiters have excellent functional and technical knowledge and well-established relationships with the top independent ERP and BI experts in the country.

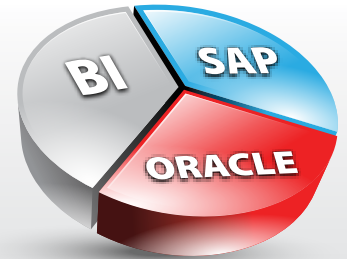

EdgeRock's exclusive focus on ERP and BI expertise means you always work with a highly qualified team that can quickly pinpoint your specific requirements and deliver exceptional consultants that accurately match your project objectives. And EdgeRock works fast, usually presenting a minimum of 3 highly-qualified candidates within 48 hours.

Over 98% of EdgeRock consultants have worked on major ERP/BI projects for Fortune 1000 companies.

EdgeRock consultants have expertise in 95% of the SAP, Oracle, PeopleSoft and BI technical and functional areas.

Over 97% of EdgeRock consultants have more than 10 years of ERP and BI project experience.

"EdgeRock consultants have the expertise to help you reach your goals faster with less risk."

EXPERTISE

www.edgerock.com

SAP Group

EdgeRock's SAP consultants will help you quickly streamline and optimize existing SAP business processes, as well as implement the latest SAP updates and technologies. For example, EdgeRock's SAP consultants can help you:

- ◆ Optimize ERP, CRM, HCM, PLM, SRM, SCM and financial management applications.
- ◆ Speed access to timely information
- ◆ Improving techniques for collaboration and communication

Oracle Group

EdgeRock's Oracle and PeopleSoft consultants will help you transform existing business processes, as well as implement the latest Oracle and PeopleSoft updates and technologies. For example, EdgeRock's Oracle and PeopleSoft consultants can help you:

- ◆ Optimize ERP, CRM, HCM, PLM, SRM, SCM and financial management applications.
- ◆ Improve operational performance
- ◆ Develop self-service portals that streamline communication and reduce operational costs

BI Group

EdgeRock's BI consultants will help you quickly improve reporting, as well as implement the latest BI applications and technologies. For example, EdgeRock's BI consultants can help you:

- ◆ Enable real-time decision making
- ◆ Identify key business trends
- ◆ Model complex business scenarios
- ◆ Build a complete and integrated system for managing and optimizing enterprise-wide performance
